

# **Drawing with Turtle**

September 5, 2024

#### Students will be able to:

- Navigate the Wipple Playground
- Move the Turtle to draw a shape
- Use the repeat command to make a spirograph

#### Today's plan:

- Warm up: Spirograph
- Guided practice: Setting up Wipple
- Turn and talk: The repeat command
- Partner activity: Spirograph

### Warm up: Spirograph

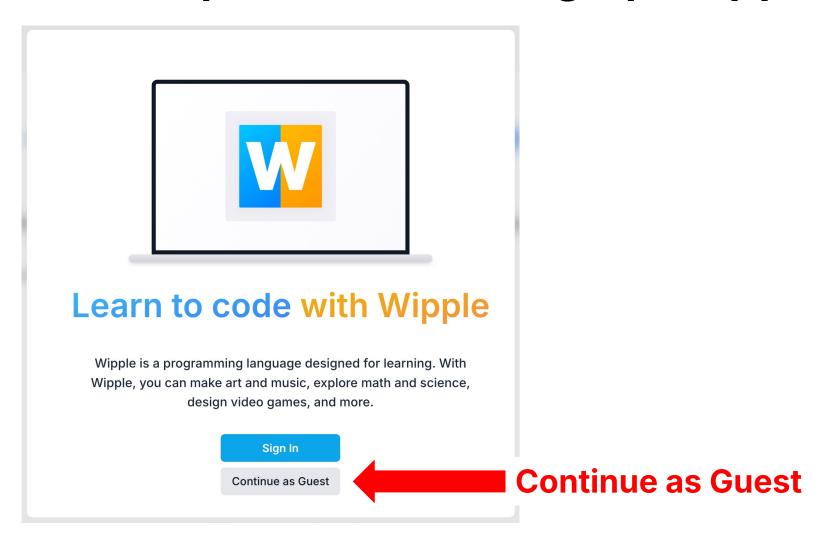

- Work with your table to draw a shape using the spirograph.
- Discuss: How often does the shape repeat?
- Brainstorm instructions so another table can draw your shape.
- Exchange instructions with the table on your left. Were your instructions effective? How could you make your instructions easier to understand?

Spirograph image: Pixabay, CC0 1.0

- You can make a computer draw your spirograph using the same instructions!
- Work with a partner
- Open your computers and go to wipple.org

Click the button

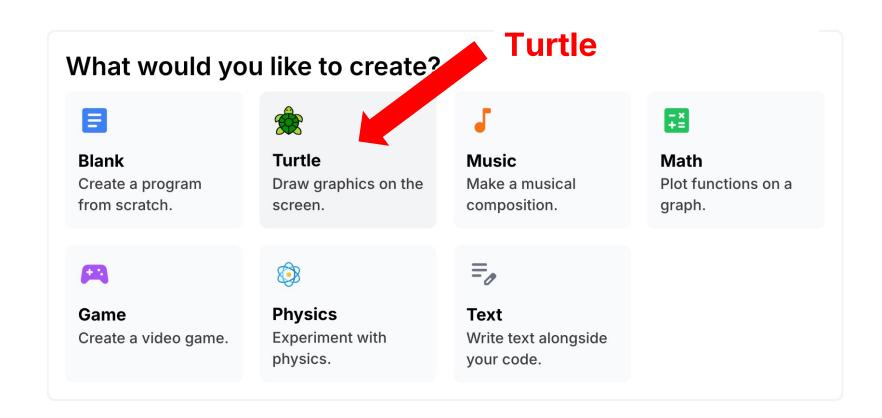

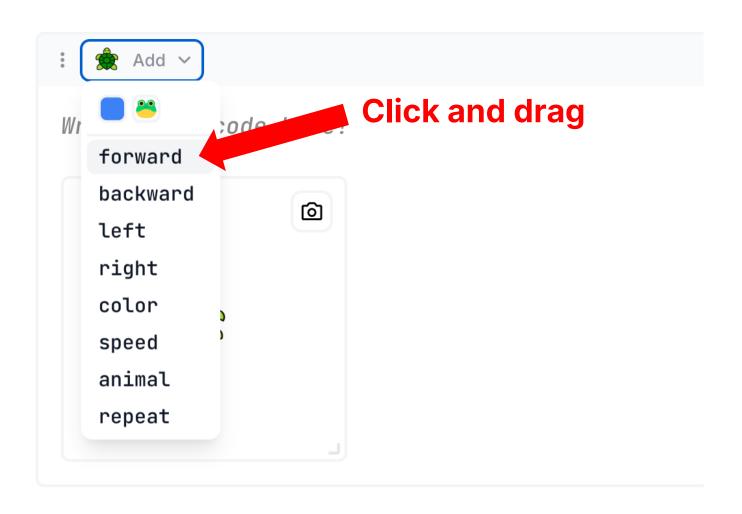

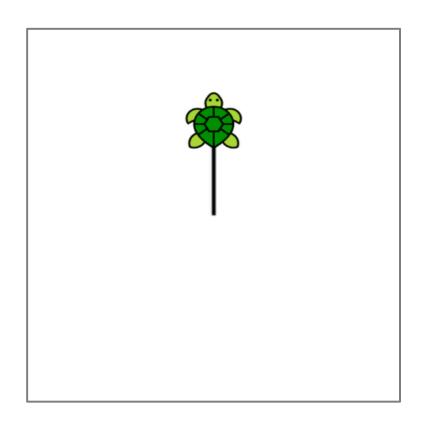

No Playgrounds

You can create a new playground or start a lesson.

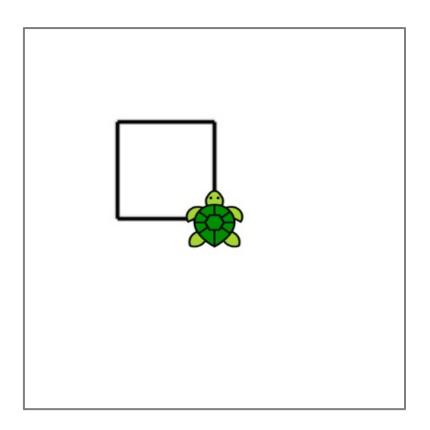

- 1. Click "Start coding now"
- 2. Click "Continue as Guest"
- 3. Click "New Playground"
- 4. Click "Turtle"
- 5. Click "Add" and drag forward into code box

- Try all the commands:
  - forward
  - backward
  - left
  - right
- Can you make a square?

#### Turn and talk: The repeat command

Read your instructions for drawing a square. How many instructions do you have? How could you use fewer instructions?

Listen for: repeat, times, again

#### The repeat command

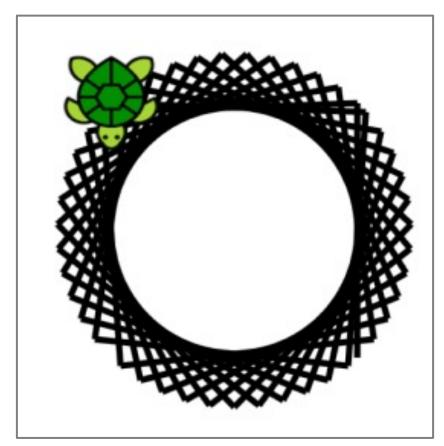

{ means begin, } means end

### Partner activity: Spirograph

Use the commands you learned today and repeat to

draw a spirograph!

- Work with your partner
- Click (a) to save
  a photo when you're
  done
- Tip: Drag speed into your code to make the turtle go faster

#### Exit ticket (on your own)

Upload your photo

How many times did you repeat to draw your spirograph?

Could you draw your spirograph without repeat? Why or why not?
